

## A Conceptual Guide to NeoOffice 2 for Mac OS X

A Conceptual Guide to NeoOffice 2 was written by an educator who is as passionate about lifelong learning as he is of the software applications he uses and teaches. The book includes ten hands-on lessons that walk users step-by-step through the creation of various documents using the open source office suite. For users who wish to find specific instructions quickly and easily, four quick reference guides are also provided for each of the major applications bundled with NeoOffice 2. Internet access is required to download the necessary lesson files and free NeoOffice software.
