

Meetup + Google + Hangouts On Air: How to video record group presentations

A step-by-step technical booklet for Meetup Organizers on producing videos. Ugh! I cannot make the next Meetup Event. Are you recording it? Does this sound familiar? Most Meetup Organizers are asked by members for more videos. * Learn how to use a 2+1 laptop production setup with Google+ Hangouts On Air. * Determine how many people are needed for a video production.* Find out what equipment is necessary for multiple views of group presentations. * Print a checklist for video recording a live Meetup Event. Your members will love you for thinking of them. This book primarily covers the technical aspects of video recording a group presentation. It is both useful for the seasoned Meetup Organizer with a growing membership and helpful for groups with a new leader. The information is beneficial for Meetup Groups focused on teaching with public speakers who use slide presentations with their talks. The goal is to show how to produce engaging videos and build a library of past Meetup Events for your members and interested guests or sponsors.
