App Development for Android and iPhone  
The Quick and Simple Way to Learn App Development for Beginners So, you have decided that youd like to develop apps for Android or iPhone. It seems to be the smart choice to make, considering the rising popularity of mobile devices. Whether you want to make apps for Android devices, like Samsungs latest smartphones, or you would like to create exclusively for Apples iPhone range you will find plenty of wonderful information in the following pages. Before getting into the actual app development lessons, you should consider which platform to choose. Some programmers prefer to work with one or the other, but many are starting to understand the potential of releasing apps for both platforms. After you have decided which platform you would like to focus on first, the following chapters contain everything that you will need to get a firm footing in app development. There is a whole lot to learn, but everyone needs to start somewhere. For now, you can find out what software you will need, and how to create your first, basic app projects.
