

Cuba: 400 Years of Architectural Heritage

Exquisite, rare photographs and timely, illuminating commentary reveal a rich architectural history waiting to be rediscovered as travel to Cuba burgeons among Canadian, European, and Latin American tourists and gradually becomes more accessible to visitors from the United States as well. The lucid, intelligent text and superb photographs shot exclusively for this book present the architectural treasures of the entire island, from the first India bohios, early colonial structures, and Mudejar craftsmanship to baroque churches, classically inspired civic buildings, ambitious modernist designs, and present-day preservation work. Now in this practical paperback edition, this unique reference source will be valued by architects, preservationists, historians, students, and armchair and actual travelers. From the Trade Paperback edition.
