

My Mac is a Drug (2nd Edition)

This recollection of how technology has taken over my life will both amaze and serve as a warning to you all. Covering the Apple design process, keynotes, and the products that people worldwide buy in their millions. We have all experienced at one time or another, buying a faulty product and having to return it for an exchange. The following section of my experience may be an exception, but it is real none the less. For me, Apple needs Steve Jobs to inject the passion into members of staff. To release great products and to innovate, Steve needs to be there. ****New 2nd Edition**** Updated since Steve Jobs passed away, my reflection on how things have changed, plus bringing you right up to date about how I no longer chase the latest technology.
