

FE Other Disciplines Practice Problems

Comprehensive Practice for the Computer-Based Other Disciplines FE Exam FE Other Disciplines Practice Problems contains over 320 multiple-choice problems that will reinforce your knowledge of the topics covered on the NCEES Other Disciplines FE exam. These problems are designed to be solved in an average of three minutes, to demonstrate the format and difficulty of the exam, and to help you focus on individual engineering concepts. Like the exam, problems are grouped by engineering topic. Solutions are clear, complete, and easy to follow. Step-by-step calculations use equations and nomenclature from the NCEES FE Reference Handbook to help increase your familiarity with the exams supplied reference. Units are meticulously identified and rigorously carried through in all calculations. FE Other Disciplines Practice Problems may be used by itself for independent problem-solving practice, or it may be used in conjunction with the FE Other Disciplines Review Manual. This book follows the FE Other Disciplines Review Manual in chapter sequence, nomenclature, terminology, and methodology, so you can easily find clear explanations of topics where you need more support. Both products are part of PPIs integrated review program available at feprep.com. Topics Covered Chemistry Dynamics Electricity, Power, and Magnetism Engineering Economics Ethics and Professional Practice Fluid Mechanics and Dynamics of Gases and Liquids Heat, Mass, and Energy Transfer Instrumentation and Data Acquisition Materials Science Mathematics and Advanced Engineering Mathematics Probability and Statistics Safety, Health, and Environment Statics Strength of Materials
