

## Fighting for the Future: Will America Triumph?

New introduction reflects upon the events of September 11, 2001. Highly acclaimed military strategist and writer Ralph Peters challenges America's defense establishment and national leadership with startling insights and no-holds-barred criticism. His radical assessment of the future of conflict and the kinds of enemies we will face has already excited international controversy and influenced policy. Peters identifies a new warrior class and a new culture of conflict that could undo America on the battlefields of the future, as seen in the events of September 11, 2001. He broadly reinterprets the meaning of strategy. His writing—tough, yet elegant—makes dramatic new ideas accessible to the general reader, as well as to businessmen, diplomats, and soldiers. Will America Win? Yes, but only if her leaders open their minds to the new and dangerous international environment left in the wake of the Cold War.
