

## Finders Keepers: Selected Prose 1971-2001

Finders Keepers is a gathering of Seamus Heaneys prose of three decades. Whether autobiographical, topical or specifically literary, these essays and lectures circle the central preoccupying questions: How should a poet properly live and write? What is his relationship to be to his own voice, his own place, his literary heritage and the contemporary world? As well as being a selection from the poets three previous collections of prose (Preoccupations, The Government of the Tongue and The Redress of Poetry), the present volume includes material from The Place of Writing, a series of lectures delivered at Emory University in 1988. Also included are a rich variety of pieces not previously collected in volume form, ranging from short newspaper articles to more extended lectures and contributions to books. In its soundings of a wide range of poets - Irish and British, American and East European, predecessors and contemporaries - Finders Keepers is, as its title indicates, an announcement of both excitement and possession.
