

## urban houses

Every city site is a puzzle. How does a new house fit into the dizzying jigsaw of surrounding buildings? Urban Houses answers that question with almost 300 full-color photographs and full information on innovative city homes. Narrow sites, challenging locations, technical questions? these houses confront the most difficult urban problems. Special attention is given to facades, the public face of a private home, and how each project was joined to the urban fabric of its area.
