

# The Singularity is Already Here: An Indigenous and Grassroots Perspective on Our Technological Future

The Singularity is Already Here is a critical look at Singularity Theory and Transhumanist philosophy from an indigenous and grassroots perspective. It looks at issues of equity, shamanistic origins, mystical correlations, and scientific paradigms. Its basic thesis is that futuristic theories that do not acknowledge and investigate the vast storehouse of experiences of oneness and internal states similar to descriptions of a technological singularity had by shamans, mystics, healers and ordinary people, are not approaching the subject holistically, thus making their assertions incomplete and inconclusive at best.
