

Quick Questions in Ankle Sprains: Expert Advice in Sports Medicine

Are you looking for concise, practical answers to questions that are often left unanswered by traditional sports medicine references? Are you seeking brief, up-to-date, expert advice for common issues that can be encountered when working with athletes? Quick Questions in Ankle Sprains: Expert Advice in Sports Medicine provides a unique format of concise and to the point responses with clinical application, backed by the latest research on sports-related ankle sprains among athletes. Drs. Patrick O. McKeon and Erik A. Wikstrom and their contributors present 39 common clinical questions regarding the prevention, assessment, treatment, management, and rehabilitation of ankle sprains. Co-published with the National Athletic Trainers Association, Quick Questions in Ankle Sprains: Expert Advice in Sports Medicine provides concise answers to 39 frequently asked clinical questions. Written in a conversational tone, the authors of the individual questions represent a variety of different backgrounds and are experts in their respective field. The variety of questions and brevity of responses will make this a book that is easy to read and reference at the point of care. Some sample sections and questions include: Risk and reduction of ankle sprains What effect does prophylactic bracing and/or taping have on reducing lateral ankle sprain risk? Diagnosis What are the most useful clinical tests to accurately diagnose syndesmotic and medial ankle sprains? Treatment and rehabilitation To what extent should I use manual therapies to treat ankle sprains and chronic ankle instability?
