

NMS Surgery Casebook (National Medical Series for Independent Study)

Designed as a companion volume to the popular NMS Surgery, this newly conceptualized casebook presents a series format of surgical cases that begin with a clinical scenario and go through the decision-making process of patient management step-by-step. Chapter contents are parallel to other surgical texts, yet are organized and closely cross-referenced to NMS Surgery. The book visually corresponds to the NMS text, too, and contains 205 line drawings and 115 tables. This new complementary casebook offers medical students a structured subject review, practice questions, and an opportunity to work through clinical cases.
