# OS X 10.10 Yosemite for Users, Administrators, and Developers

OS X 10.10 Yosemite: for Users, Administrators, and Developers looks at all of the new features of OS X 10.10 Yosemite, including Handoff, SMS Relay, the updated look, Extensions, and changes to Safari and much more. For Server Administrators we look at the ability to customize connectivity globally as well as on a per-service level and the implications of some configurations. Also discussed is the new Reachability feature and security. For the Developers we take a look at the new Frameworks available with OS X 10.10 Yosemite, the changes to Xcode, and a brief look at Swift. OS X 10.10 Yosemite for Users, Administrators and Developer has something for all users of OS X.
