

## Wrecked!: An adjuster saves you heartache, hassle and money too

Mangled twisted metal, frayed wires, massive destructive charges of electricity, charred wreckage, crushed driver and passenger compartments, deployed air bags, extensive costly damage, hassle, heartache and death, these perils await just outside your door! Most drivers and vehicle owners hardly think twice about the risks taken simply by driving, fewer still can imagine the potential causes of damage awaiting even a parked unoccupied vehicle.

Through stories you will hardly believe, detailed pictures and explanations, the perilous world outside your door is explored to help you avoid financial, physical and emotional disaster. For over two decades the author has been immersed in the insurance and automotive repair industries and has seen it all. The knowledge and experience gained over this time is invaluable in avoiding costly situations you would never dream of finding yourself in. Everyday thousands of people from every walk of life start their day and encounter disaster or loss they never expected. Some are in accidents and are left owing tens of thousands of dollars not covered by insurance. Others find their vehicle inexplicably rendered useless and the repair costs astronomical. Whether a seasoned veteran driver or just learning we all need to be aware these perils. The author also decodes insurance estimates, and demystifies body repairs for those curious or already affected by the unexpected. Know what is going to happen to your vehicle and what the insurance company is actually paying for.
